TRIP SWAP

SMALL CHANGES. BIGGER JOURNEYS.

A travel discovery product that turns everyday swaps into future experiences — with the real cost always visible.

8	25	6	42
DESTINATIONS	SWAPS	CATEGORIES	TESTS

YOU KNOW WHERE YOU WANT TO GO. THE GAP IS KNOWING IF YOU CAN AFFORD IT.

Budget tools start with spending. Travellers start with desire. The missing piece is a plan with a timeline.

01 · BANK

Shows what you already spent. Not what is missing, or when it becomes possible.

02 · SPREADSHEET

Asks for salary, statements and categories. It loses the person on the first screen.

03 · INSPIRATION

Shows photographs and prices. It does not turn desire into a decision.

THE BRIDGE: A PLAN WITH A TIMELINE.

THE SIGNAL

€0*

~~€650 planning target~~

The €0* is a metaphor, not a discount. The real planning cost stays visible on every surface.

THE WORLD IS THE REWARD.

TripSwap starts with a destination and reveals the everyday choices that could fund it.

01

SPEND SMARTER

Less unnecessary transport, forgotten subscriptions and impulse purchases.

02

LIVE HEALTHIER

More walking, home cooking and fewer sugary drinks. Voluntary, never prescriptive.

03

CONSUME CONSCIOUSLY

Repair, reuse and reduce waste. Fewer things, more life.

LESS OF THIS. MORE OF THE WORLD.

THE DESTINATIONS ARE THE REWARD

DESIRE → EVERYDAY CHOICES → A TRIP WITHIN REACH.

01 **DISCOVER**
A place, a photograph, a planning target.

02 **SWAP**
Choose changes you would actually make. No salary, no statements.

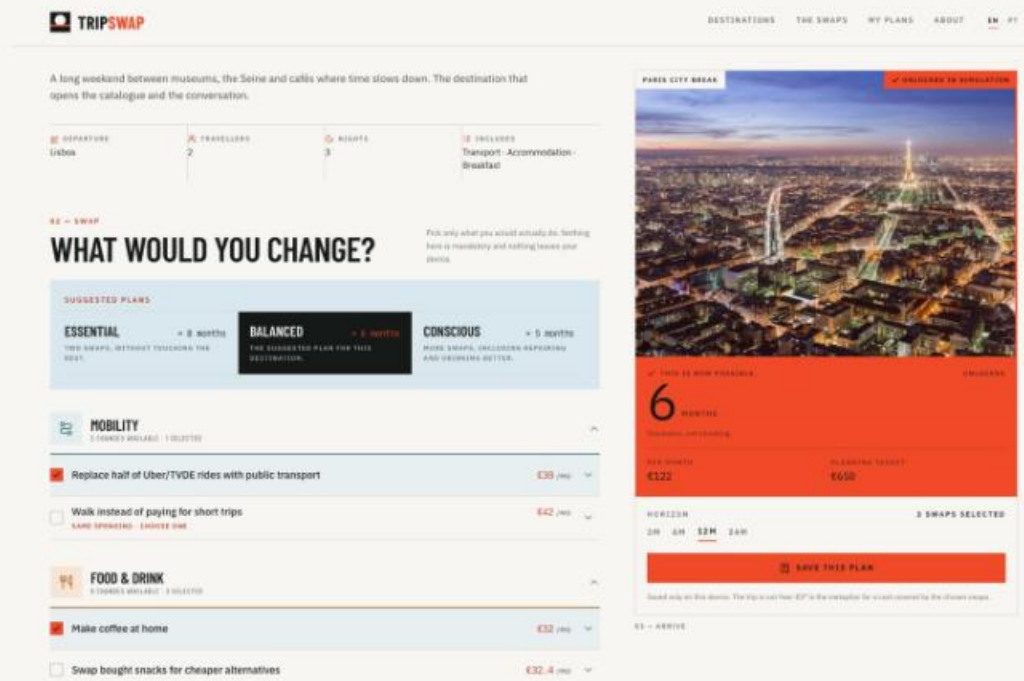

03 **UNLOCK**
The destination photograph, the months and the projected saving.

EXAMPLE · PARIS, BALANCED

3	€122	6
SWAPS	/ MONTH	MONTHS

Projection, not money already saved.

THE REWARD CARD

Paris, Balanced. Same photo, same card height; every unlock is a projection.

The reward card transforms in place: same photo, same height, no extra section.

A SMALL PRODUCT WITH A SHARP BOUNDARY.

IN THE MVP

8 destinations with illustrative planning targets

25 swaps · 6 categories · deterministic engine

Overlap groups, one-time savings, receipts

The swaps catalogue · selection carried to plans

Saved plans, PT/EN toggle, calendar reminders

42 tests · CI · Vercel · mobile

DELIBERATELY OUT

Authentication, accounts or sync

Booking, payments or real fares

Live prices, maps, weather or external APIs

Push notifications or a backend

Custom swaps and dream trips (roadmap only)

Social feed, CMS or admin panel

Criterion: without this, does the user still get the core value?

01
DISCOVER
Inspiring destinations with transparent targets.

02
SELECT
Realistic swaps, no financial data.

03
UNDERSTAND
Savings, horizon and the receipt.

04
SAVE
Plans and reminders, locally.

STATIC, DETERMINISTIC, PHOTOGRAPHY-LED.

No backend, no auth, no live prices. The result is reproducible from the visible assumptions and does not use generative AI for arithmetic.

DESIGN TOKENS

Canvas · Ink · Signal · Pale blue

TYPE

Barlow Condensed · IBM Plex Sans · IBM Plex Mono

CATEGORY COLOURS

Teal · apricot · violet · sage · rose · gold

ONE ACCENT. NO DASHBOARD.

STATIC

Built once, shipped as static files. No server to operate.

DETERMINISTIC

The engine answers every number; AI does not calculate at runtime.

LOCAL-FIRST

Plans and reminders stay in the browser. No account required.

EVERY NUMBER IS REPRODUCIBLE.

RECURRING

`(original − alternative) × frequency`

ONE-TIME

`original − alternative · once`

PROJECTION

`monthly × months + one-time`

HORIZON

`first whole month at the target`

GUARDRAILS

Overlaps: meals, snacks, nights, subscriptions, repairs, trips. One per group.

One-time: counted once, never as monthly income.

Games of chance: a fixed conservative estimate: €20 → €15 = €5/month. No inputs, no invented average.

€0*: a metaphor for a cost covered by swaps. Not a discount, not a free trip.

No claims: no medical promises, weight loss or avoided emissions.

THE RECEIPT SHOWS THE FORMULA. THE RESULT IS NOT GENERATED.

PARIS · BALANCED

6 months

€122 / month · €650 target

DOURO · BALANCED

5 months

€87 / month · €420 target

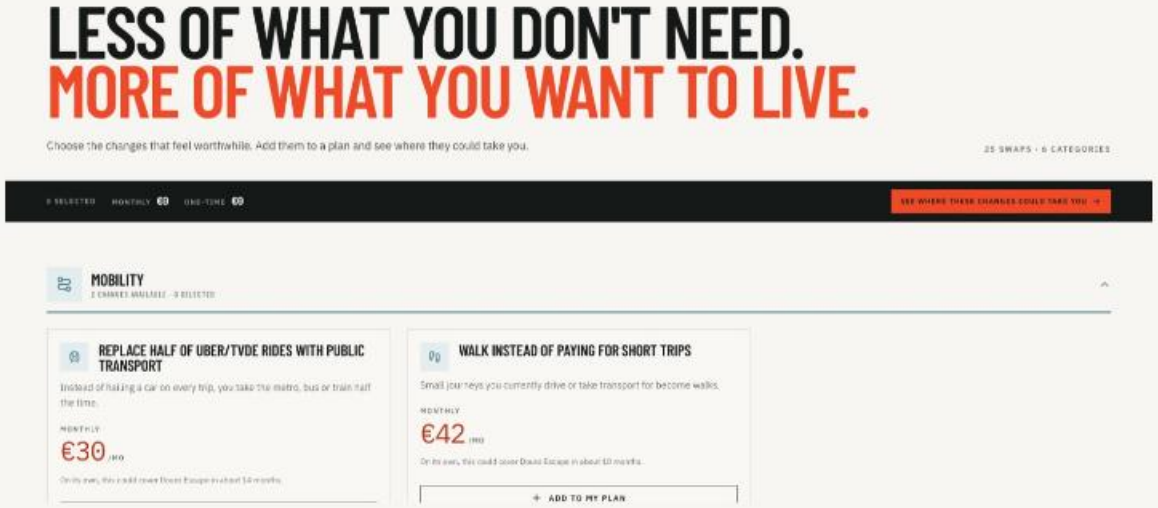

ICELAND · BALANCED

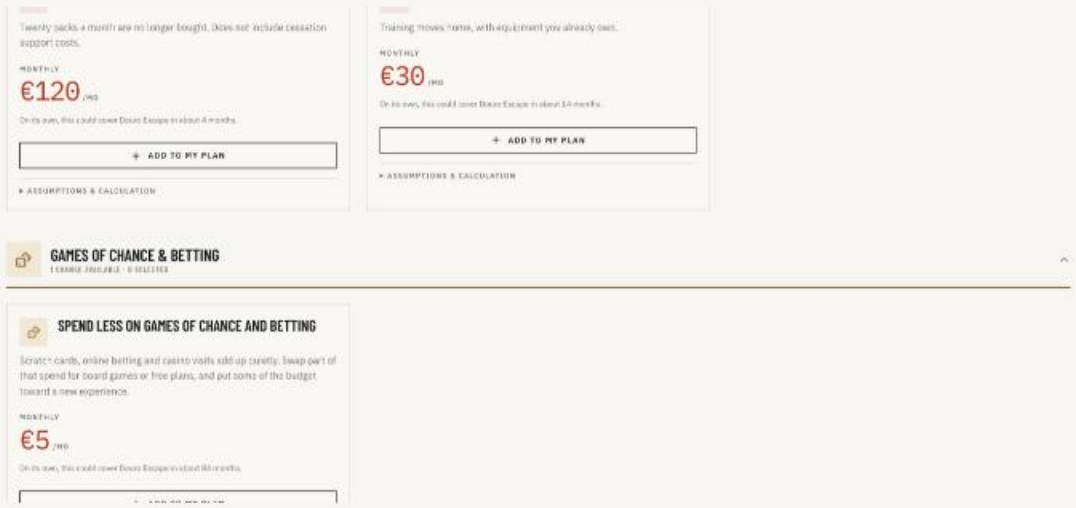

21 months

€94 / month · €1,900 target

25 CHANGES. 6 CATEGORIES. ONE PLAN.

LESS OF WHAT YOU DON'T NEED.
MORE OF WHAT YOU WANT TO LIVE.

01
An independent catalogue, not a destination dashboard.

02
Select swaps, see monthly and one-time savings separately.

03
Carry the selection into any destination plan.

04
Games of chance with a fixed €5/month estimate; roadmap cards are not interactive.

THE SWAPS ARE THE ACTIONS. THE DESTINATION IS THE REWARD.

THE REPOSITORY IS THE EVIDENCE.

110+	20+	42	3 + 3
CONVENTIONAL COMMITS	MERGED PRS	TESTS	AGENTS + SKILLS

TWO REAL AI FAILURES

1 · Overlap: the engine summed two swaps from the same group. A test failed with two lines instead of one. Fixed the engine, not the test.

2 · i18n: a literal return type made the EN dictionary invalid. `tsc` caught it; widened the type and added a parity test.

THE PROCESS

CLAUDE.md: stack, rules, design guardrails and non-negotiables.

Iterations: requirement → prompt → plan → test → commit.

Evidence: ITERATIONS, PROMPTS, DECISIONS, TESTING.

Delivery: CI on every PR; Vercel on main.

AI WROTE CODE. TESTS AND COMMITS MADE IT ACCOUNTABLE.

WHAT THIS IS. WHAT IT IS NOT.

HONEST LIMITS

Illustrative planning targets, not verified prices

No accounts, backend, booking or payments

No live fares, maps or push notifications

No actual savings tracking; every unlock is a simulation

Calendar reminders are .ics files, opened by the user

NEXT

Savings tracking against real balances

Create your own swap · add your dream trip

Accounts, sync and shared plans

End-to-end tests and pre-rendering

THE WORLD
IS THE REWARD.

SMALL CHANGES.
BIGGER JOURNEYS.
